### BB Preamp, BB Plus

"BB Preamp is my favorite overdrive pedal that I have heard and played in a long time. It is a perfect match for any guitar and amp where you want to add more "Hair" for solos that doesn't color your tone and also adds incredible attack at the same time. When I engage it on my Bogner XTC it feels like I am shifting into the 6th gear! BB should possibly be called AA or better yet AAA cause it will retire all your overdrive pedals after trying one out! I cannot wait to put my hands on the BB Plus! BB rocks harder and better!"
